

Fact-Checking the Assertions of the Parties in *Hyatt v. Squires*¹ on Prosecution Laches before the US Supreme Court

Ron D. Katznelson, Ph.D.²

1 Introduction

Through two influential decisions in 2002 that marked a stark departure from judicial holdings since the 1952 Patent Act, the Federal Circuit substituted the patent statutes with judge-made law, to extinguish patent rights under the prosecution laches doctrine. Under this doctrine, the extra-statutory charge of applicant's "unreasonable and unexplained delay in prosecution," can result in forfeiture of the patent right. The first decision in *Symbol Technologies*³ empowered courts under that charge to hold unenforceable patents in infringement suits. The second decision, *In re Bogese*,⁴ empowered the US Patent and Trademark Office (PTO) to do so through prosecution laches rejection of applications pending at the Office. Recently, in its decisions against inventor Gilbert Hyatt in the *Hyatt I*⁵ and *Hyatt II*⁶ cases, the Federal Circuit created for the first time a substantive burden-shifting rule holding that a prosecution "delay of more than six years raises a 'presumption that it is unreasonable, inexcusable, and prejudicial.'" ⁷ The Court affirmed the district court decision that Hyatt forfeited his patent applications under the prosecution laches doctrine.

Mr. Hyatt [petitioned for certiorari](#) to the U.S. Supreme Court on March 2, 2026, seeking review (Hyatt Per.). On May 26, 2026, the PTO filed a [Brief in Opposition](#) (PTO Br.) to Hyatt's petition and on June 5, 2026, Mr. Hyatt filed his [Reply Brief](#) (Hyatt Br.).

This note focuses on the factual assertions by both parties on the scope and level of use of the prosecution laches defense. The historical facts of the judge-made law on continuing applications prior to the 1952 Patent Act are presented, and the specific change that authorized them by statute under the 1952 Patent Act is discussed.

2 Contrary to the PTO assertion, the use of prosecution laches defense in recent years is rampant against patents filed post 1995

The PTO argues that Hyatt's petition presents a question that "has limited and diminishing importance because the vast majority of pending patent applications and patents in force today postdate the 1995 change in patent term" PTO Br. at 8. The PTO explains why in its opinion the "limited and diminishing significance of the question presented provides a further reason to deny review." *Id.*, at 17. It makes the following counterfactual speculation:

The Federal Circuit has recognized that under current law, cases of similar delay "are not likely to be frequently repeated, as patent terms are now measured from effective filing date, subject to only limited extensions provided by statute, not by delaying issuance by refiling." *Cancer*

¹ Gilbert P. Hyatt, Petitioner, v. John A. Squires, Under Secretary of Commerce for Intellectual Property and Director, United States Patent and Trademark Office. [Docketed March 4, 2026, case No. 25-1049](#).

² Author contact: rkatznelson@roadrunner.com

³ *Symbol Techs., Inc. v. Lemelson Med.*, 277 F.3d 1361 (Fed. Cir. 2002) ("*Symbol I*").

⁴ *In re Bogese*, 303 F. 3d 1362 (Fed. Cir. 2002).

⁵ *Hyatt v. Hirshfeld*, 998 F. 3d 1347 (Fed. Cir. 2021) ("*Hyatt I*").

⁶ *Hyatt v. Stewart*, 148 F. 4th 1376 (Fed. Cir. 2025) ("*Hyatt II*").

⁷ *Hyatt I*, 998 F. 3d at 1369. (emphasis added).

Research Tech. Ltd. v. Barr Labs., Inc., 625 F.3d 724, 732 (2010) (citation omitted), cert. denied, 565 U.S. 977 (2011).

Today, the vast majority of pending applications and patents in force post-date the 1995 amendment. And while petitioner contends (Pet. 31-32) that prosecution laches is frequently invoked, he cites no case in which the Federal Circuit has relied on the doctrine to bar a patent application that was filed after the effective date of the 1995 amendment.

PTO Br. at 17-18. Countering that, Petitioner Hyatt's Reply asserts: "Hundreds of litigants have asserted prosecution laches in the past few years. Pet.31-32. Indeed, at least 30 more have done so in the mere three months since Petitioner filed his Petition—with every one of those cases involving patents claiming priority to filing dates after 1995." Hyatt Br. at 11.

PTO's speculative assertions belie the facts, which rather align closely with Hyatt's assertions. Appendices A1-A2, identify patent infringement cases in which defendants asserted the prosecution laches defense subsequently to the holding of *Hyatt I* in June 1, 2021. As these Appendices show, such defenses were asserted in at least **424** federal cases with a total across these cases of **1,786** Patents in Suit,⁸ *all of which were filed after 1995*.

Appendix A2 separately identifies the cases with prosecution laches defense asserted since Mr. Hyatt filed his petition on March 2, 2026. Here too, Hyatt Brief's assertion of 30 such cases is confirmed exactly. The PTO is clearly wrong in its assertion that prosecution laches "has limited and diminishing importance" because these assertions against post-1995 patents are rampant.

2.1 The Federal Circuit Applied the Prosecution-Laches Two-Element Framework Instead of Holding the Doctrine Inapplicable to Post-1995 Patent Applications

The PTO asserted that Petitioner had identified no case in which "the Federal Circuit has relied on the doctrine to bar a patent application that was filed after the effective date of the 1995 amendment." PTO Br. at 18. That observation does not answer the relevant question, correct as it may be. The pertinent inquiry is not whether the Federal Circuit has ultimately sustained a prosecution-laches defense against a post-1995 application, but whether the court has treated such applications as legally susceptible to forfeiture under that doctrine. Its decision in *Google LLC v. Sonos, Inc.*⁹ demonstrates that it has.

In the case below, District Judge Alsup's decision on prosecution laches¹⁰ expressly ruled that the prosecution laches doctrine applies to post-1995 applications, and stated in relevant part (at 34) as follows:

3. PROSECUTION LACHES APPLIES TO POST-1995 APPLICATIONS.

Much ink has been spilled by Sonos in seeking to demonstrate that the affirmative defense of prosecution laches is dead (Opp. 2–3, 5–6). It is not.

Sonos (correctly) observes that, despite issuing comprehensive opinions expounding on the doctrine of prosecution laches in recent years, and even as recently as a few months ago, the Federal Circuit has yet to affirm the application of this defense to patent applications originally

⁸ This total count is the sum of all Patents in Suit listed for the identified cases which includes counting specific patents more than once if they are asserted in more than one case. Docket-Navigator lists all Patents in Suit in a case and may contain defendants' patents asserted in counterclaims in the case.

⁹ *Google LLC v. Sonos, Inc.*, [Appeal No. 24-1097 \(Fed. Cir. Aug. 28, 2025\)](#).

¹⁰ *Google LLC v. Sonos, Inc.*, [3:20-cv-06754 \(NDCA October 6, 2023\)](#)

filed after 1995. Needless to say, if the doctrine were dead with respect to applications filed after 1995, it would have been easy for the Federal Circuit to say so in opinions it issued after 1995. And, the Federal Circuit has only affirmed the application of prosecution laches after 1995 (in 2023, 2021, 2005 and 2002). See *PMC*, 57 F.4th at 1350; *Hyatt*, 998 F.3d at 1370; *Symbol Techs. II*, 422 F.3d at 1385; *In re Bogese*, 303 F.3d at 1363. Meanwhile, the defense was only endorsed by the Federal Circuit as a grounds for challenging patent enforceability after 1995 (based on Supreme Court precedent from a century ago). *Symbol Techs. v. Lemelson*, 277 F.3d 1361, 1364–68 (Fed. Cir. 2002).

Sonos has done exactly what the Supreme Court has long said should not be done. “It will not do for the patentee to wait until other inventors have produced new forms of improvement, and then, with the new light thus acquired, under pretence of inadvertence and mistake, apply for such an enlargement of his claim as to make it embrace these new forms.” *Miller v. Bridgeport Brass Co.*, 104 U.S. 350, 355 (1881).

On appeal, the Federal Circuit refrained from holding the prosecution laches doctrine categorically unavailable as a matter of law for post-1995 applications, or from reversing Judge Alsup on *this issue*. Instead, the court applied the established two-element prosecution laches framework,¹¹ notwithstanding its cognizance that the asserted patents originated from post-1995 applications.¹² The panel held only that Google failed to establish prejudice. It did not reject prosecution laches as categorically unavailable to post-1995-applied patents. To the contrary, it articulated its standard of two-element framework that only applies in considering prosecution laches and resolved the appeal on the prejudice element (on which it spent considerable space).¹³ Had prosecution laches been legally unavailable against post-1995 applications, there would have been no occasion to articulate or analyze unreasonable delay or prejudice. The Federal Circuit thus treated the asserted patents as subject to the doctrine, even though it ultimately found Google's proof insufficient to establish the defense.

The practical response of patent litigants following *Google v. Sonos* confirms this understanding. As Appendices A1-A2 show, after the Federal Circuit's August 28, 2025 decision, accused infringers continued to assert prosecution laches in **84** patent infringement cases involving patents that *all originated from post-1995 applications*. Whatever the ultimate merits of those defenses, their repeated assertion by sophisticated litigants represented a contemporaneous and real-world understanding that the Federal Circuit had not foreclosed the doctrine's application to post-1995-applied patents. Had the Federal Circuit been understood to have rejected Judge Alsup's legal analysis on this issue, one would expect the opposite result: abandonment of the defense as legally unavailable. Instead, the continued invocation of prosecution laches across multiple cases reflected the prevailing view among practitioners that Judge Alsup's analysis remained available as persuasive authority.

That understanding was entirely consistent with the current state of the law. The district court's legal conclusion on post-1995 applications had not been reversed, and no Federal Circuit decision held that prosecution laches was categorically unavailable for patents originating from

¹¹ See *Id.*, slip op. at 15–17 (“To succeed in its defense, Google must establish ... unreasonable and inexcusable [delay] ... and ... prejudice attributable to that delay”; “We limit our discussion to the second element—prejudice”).

¹² See *Id.*, slip op. at 3 (“the patents were each filed in April 2019 and claim priority from a September 2006 provisional application and a September 2007 nonprovisional application”).

¹³ See *Id.*, slip op at 15-17 (dedicating two pages to the issue of prejudice).

post-1995 applications. It is inconceivable that, short of Supreme Court abrogation, the Federal Circuit will deviate from its prosecution laches holdings and standards that *disregard* the patents' application dates. Under those circumstances, defendants and their counsel act reasonably in continuing to evaluate and assert prosecution laches where the prosecution history and facts appeared to them as supporting the defense.

2.2 The Assertion of Prosecution Laches at the ITC

A more troubling trend is the rise in prosecution laches assertion by accused infringers at the International Trade Commission (ITC). Appendix A1 shows three (3) ITC cases in which respondent asserted the prosecution laches defense since the *Hyatt I* holding in 2021 (see first 3 rows). In contrast, in a separate search on Docket-Navigator for the period starting in 2002, there were only three ITC cases with prosecution laches assertions during the two decades.¹⁴

Even if the litigation does not reach the determinations on prosecution laches for adjudicating the alleged “unreasonable delay in prosecution,” the shift of the burden of proof to the patent holder under the Federal Circuit’s six-year “presumption that it is unreasonable, inexcusable, and prejudicial”¹⁵ must be contended with, as it is often argued by counsel for accused infringers.¹⁶ The presumption held in those Federal Circuit decisions is *precedential*¹⁷ and applicable broadly—not merely to Petitioner Hyatt.

Patent application prosecution from earliest priority filing to patent issuance involves objective and necessary durations spanning several years. The effect of the *Hyatt I* presumption on patent holders are staggering: it is shown here in Figure 1 and in a statistical study reported by the Small Business Technology Council (SBTC) that 30% of US patents have issued more than six years after their earliest priority date.¹⁸

The effect at the ITC can be devastating for the domestic US industry. Many of these industries are protected by patents for inventions that required large investments over extended periods to develop, improve, and perfect the inventions. Accordingly, many of those patents issued from continuation-in part (CIP) applications with early priority dates and are more susceptible to the *Hyatt I* six year presumption of unenforceability. Figure 1 below shows the distribution of prosecution time at the PTO of 1,770 utility patents asserted at the ITC. It shows that 36% of them issued later than six years after their earliest priority date. This is significantly larger share of patents compared to the 30% share of all issued utility patents shown in the figure and discussed above. At the 10 year pendency mark, the share of ITC patents is at 13.8% compared to 6.5% for all issued patents.

¹⁴ These were 337-TA-868, 337-TA-907, and 337-TA-955.

¹⁵ *Hyatt I*, 998 F. 3d at 1369. (emphasis added).

¹⁶ *Wirtgen America v. Caterpillar*, 746 F.Supp.3d 218, 227 (D. Del. 2024 (“Caterpillar cites to *Hyatt* for the proposition that a six-year delay is *presumptively unreasonable*.”) (Emphasis added); *PMC v. Apple*, Appeal No. 21-2275, Oral Argument (Fed. Cir. July 7, 2022) (Apple’s counsel states at 21:50: PMC’s delay until filing a continuation “was eight years; *that’s enough*, as [*Hyatt I*] said, to trigger laches.” www.cafc.uscourts.gov/oral-arguments/21-2275_07072022.mp3

¹⁷ *Hyatt I* is classified as “precedential” at www.cafc.uscourts.gov/10-12-2021-20-2321-hyatt-v-hirshfeld-opinion-20-2321-opinion-10-12-2021_1847303/ and *Hyatt II* is classified “precedential” at www.cafc.uscourts.gov/08-29-2025-18-2390-hyatt-v-stewart-opinion-18-2390-opinion-8-29-2025_2565719/

¹⁸ Br. of SBTC in Support of Federal Circuit Rehearing below (November 13, 2025) (See [Addendum 1](#)).

An attack on the US domestic industry can more easily succeed by any foreign goods importer that infringes such US patents if it can invoke the six-year presumption of unenforceability on contention under the prosecution laches doctrine.

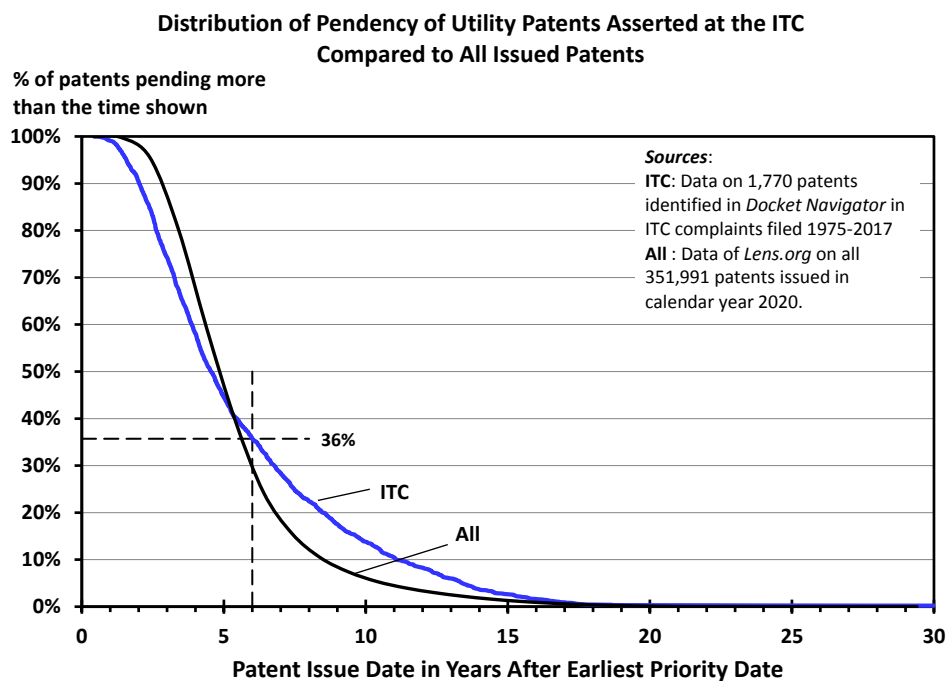

Figure 1. Comparison of pendency distributions of patents asserted at the ITC and all issued patents.

3 The correct facts on pre-1952 patent statutes reveal that they contained no prosecution timeliness requirements

In its Opposition Brief, the PTO contends that “the Patent Act does not impose a fixed time period to complete prosecution,” which in its opinion justifies the equitable prosecution laches doctrine. PTO Br. at 12-13. The argument advanced is that the “laches” defense the Supreme Court affirmed in pre-1952 decisions “did not turn on a particular statutory clause” but the Court “‘ratified the existence of the prosecution laches defense’ as a general matter.” PTO Br. 12-13. In a crucial misrepresentation to the Court, the PTO mischaracterizes an 1863 *judicial* decision as if it were pre-1952 *statutory* provision, contending that the 1952 Patent Act’s timeliness provisions “are merely analogues of similar timing limits that applied under the prior patent laws and have long coexisted with prosecution laches.” PTO Br. at 14. For support, PTO’s footnote 2 that follows this contention lists some pre-1952 statutory provisions on applicant response timing, but cited to *Godfrey v. Eames*, 68 U.S. 317, 325-326 (1863) as to the “co-pendency” provision. However, a Supreme Court decision is *not a statutory enactment*. At that time, the most critical timeliness requirement of “co-pendency” of applications was *judge-made law—not a statutory provision*.

In *Godfrey*, the Supreme Court stated: “The act of 1836 gives the applicant a right to change his specification after receiving the suggestions of the commissioner. Doubtless, this right exists and may be exercised independently of such suggestions, at any time before the commissioner has given his formal judgment upon the application; and the inventor may ‘persist in his application

for a patent, with or without any alteration of his specification.” *Godfrey*, 68 U.S. at 324. The relevant text of the 1836 Patent Act is in Section 7 (emphasis added):

But whenever, on such examination, it shall appear to the Commissioner that the applicant was not [meeting patentability requirements], he shall notify the applicant thereof, giving him, briefly, such information and references as may be useful in judging of the propriety of renewing his application, *or of altering his specification to embrace only that part of the invention or discovery which is new.* ... But if the applicant in such case shall persist in his claim for a patent, with or without any alteration of his specification, he shall be required to make oath or affirmation anew, in manner as aforesaid.

The *Godfrey* decision further states:

A change in the specification as filed in the first instance, or the subsequent filing of a new one, whereby a patent is still sought for the substance of the invention as originally claimed, or a part of it, cannot in any wise affect the sufficiency of the original application or the legal consequences flowing from it. To produce that result the new or amended specification must be intended to serve as the basis of a patent for a distinct and different invention, and one not contemplated by the specification, as submitted at the outset.

We are satisfied that there was here such substantial identity in the two specifications as brings the case within the rule thus laid down. This objection cannot be sustained.

Godfrey, 68 U.S. at 324-5. Here, it is *the Court*—not Congress—that made up “the rule thus laid down” of “co-pendency” requirement. No statute prior to the 1952 provided for anything close to “co-pendency” of applications as a timeliness requirement.¹⁹ 14 years later, relying on, and citing its decision in *Godfrey*, the Supreme Court explained:

We are not aware that filing a second petition for a patent, after the first has been rejected, has ever been regarded as severing the second application from the first and depriving the applicant of any advantage he would have enjoyed had the patent been granted without a renewal of the application.²⁰

Both of those pronouncements on co-pendency of applications as preserving the priority claim are *judge-made law* on fairness principles, but have no underlying statutory basis. They have been cited over the years as the legal basis for continuation practice and later described in patent treatise in 1930 as the authorities for such practice.²¹

¹⁹ The coauthor of the 1952 Patent Act confirmed as much shortly after passage in his paper P. J. Federico, “Commentary on the New Patent Act,” (1954), reprinted in 75 *J. Pat. & Trademark Off. Soc’y*, 161, 192 (“*Continuing applications (section 120)*). Under certain circumstances an application for patent is entitled to the benefit of the filing date of a prior application of the same inventor filed in the United States. This was not specified in the old statute but was developed by decisions of the courts beginning with a decision of the Supreme Court of 1864, *Godfrey v. Eames*, 68 U.S. 317.”)

²⁰ *Smith v. Goodyear Dental Vulcanite Co.*, 93 US 486, 500-01 (1877).

²¹ Emerson Stringham, [*Patent Soliciting and Examining: A Guide to Ex Parte Practice in the United States Patent Office*, Pacot Publications \(1930\)](#), p. 31 (“SEC 14 The effective filing date of an application is that of an earlier filed copending case disclosing the invention in question”) (listing authorities including *Godfrey* and *Smith v. Goodyear*).

The PTO's assertion that the timeliness provisions of the 1952 Patent Act "are merely analogues of similar timing limits that applied under the prior patent laws" is false. It renders invalid its hyperbolic implication that applying equitable doctrines after the 1952 Patent Act is as justified as it was before it. As shown below, in 1952 Congress occupied the field entirely, crafting elaborate timeliness requirements for co-pendency, leaving no room for the courts or the PTO to second-guess the policy balance.

3.1 The enactment in 1952 of § 120's *limitation of temporal co-pendency* constitutes a "statute of limitation"

The 1952 Patent Act introduced by statute the co-pendency requirements for the first time. It provided in 35 U.S.C. § 120 a series of conditions and constraints for statutory-compliant continuing applications. Those conditions are enumerated in § 120 by their components, as rewritten with component numbers added in brackets below (emphasis added):

Benefit of earlier filing date in the United States

[1] An application for patent for an invention disclosed in the manner provided by the first paragraph of section 112 of this title

[2] in an application previously filed in the United States

[3] by the same inventor

[4] *shall have the same effect*, as to such invention, as though filed on the date of the prior application,

[5] if filed before the patenting or

[6] abandonment of or

[7] termination of proceedings on the first application or

[8] on an application similarly entitled to the benefit of the filing date of the first application and

[9] if it contains or

[10] is amended to contain a specific reference to the earlier filed application.

The detailed list of ten (10) statutory conditions must be interpreted as exhaustive under the negative implication canon of *expressio unius est exclusio alterius*.²² This canon is strongest here, "when the items expressed are members of an 'associated group or series,' justifying the inference that items not mentioned were excluded by deliberate choice, not inadvertence."²³ With this detail in the statute, Congress left no "gap" for equitable second-guessing. Conditions [1]-[3] and [5-8] constitute the temporal co-pendency *limitation*, which is none other than a temporal "statute of limitation." Therefore, in § 120 Congress *guaranteed* that filing of a continuing application *within those ten enumerated conditions*, subject to no other extra-statutory conditions, "*shall have the same effect ... as though filed on the date of the prior application.*"

However, forfeiture of patent rights in a continuing application that meets all of § 120 conditions by invoking prosecution laches rejection contravenes the statutory *guarantee* that its filing "*shall have the same effect ... as though filed on the date of the prior application,*" because such

²² Antonin Scalia and Bryan A. Garner, *Reading Law: The Interpretation of Legal Texts*, §10 (Thomson/West 2012) (Negative-Implication Canon).

²³ *Barnhart v. Peabody Coal Co.*, 537 U.S. 149, 168 (2003).

forfeiture denies that statutory-compliant continuing application *the same effect*. Indeed, the Federal Circuit’s predecessor court explained that “justice and reason ... require that § 120 be held applicable to all bases for rejection, that its words ‘same effect’ be given their full meaning and intent.”²⁴

Clearly, the statutory guarantee in § 120 permits no exceptions, equitable or otherwise. Congress *did not permit* any equitable judgment that prosecution delay was not “unreasonable” as a required condition for the filing to “have the same effect.” The statutory requirement that it “*shall have the same effect*” includes the effect of enforceability and such effect cannot be disturbed by interjecting any extra-statutory judgement that a filing was “unreasonably delayed.” Doing so completely emasculates § 120.

3.2 How § 120 specifically codified CIP practice

The judge-made law first enunciated in *Godfrey* in 1863 did not use the “continuation-in-part” (CIP) term but actually involved a “*change in the specification* as filed in the first instance,” *Godfrey*, 68 U.S. at 324, which connotes a CIP. The term “continuation-in-part” first appeared formally on patent applications filed in 1902.²⁵ Shortly after the passage of the 1952 Patent Act, its coauthor confirmed the scope of § 120 as follows: “Continuing applications include those applications which are sometimes referred to as divisions, continuations, and continuations-in-part, the latter term being used when the second application contains additional matter not disclosed in the first.”²⁶ The specific *statutory codification* of the CIP practice is evident from the actual language of § 120, as explained below.

Once a disclosure of an invention compliant with § 112 is made in an original patent application, the inventor may later file a continuing application subject to the requirements of § 120, which in part requires that the continuing application “contains or is amended to contain a specific reference to the earlier filed application.” Clearly, the “earlier filed application” referred to, must already comply with § 112. If that specific reference is made, why then did Congress insert in § 120 the additional condition that the invention in the *continuing* application be “disclosed in the manner provided by the first paragraph of section 112.”? To be sure, continuation and divisional applications must contain specifications *identical* to those in the “earlier filed application,” which must already comply with the first paragraph of § 112. There would have been no need to expressly repeat in § 120 that requirement, had Congress intended to provide merely for continuations and divisions. Clearly, this text is not surplusage;²⁷ the intent was to *expand* the scope of § 120 *beyond* these two types of applications. In including this text in § 120, Congress specifically provided for circumstances in which the written description, enablement, or “best mode” disclosure may *differ* from that in the “earlier filed application.” Accordingly, this repeated § 112 requirement in § 120 is particularly directed at the statutory category of CIP applications, requiring that the added subject matter in the specification *also* complies with the first paragraph of § 112.

²⁴ *In re Hogan*, 559 F.2d 595, 604 (CCPA 1977).

²⁵ See [US Pat No. 784,003](#) filed as a CIP on July 25, 1902.

²⁶ Federico (1954) note 19 *supra*, at 193.

²⁷ Scalia and Garner (2012) note 22 *supra*, § 26 (“The Surplusage Canon: If possible, every word and every provision is to be given effect (*verba cum effectu sunt accipienda*). None should be ignored. None should needlessly be given an interpretation that causes it to duplicate another provision or to have no consequence.”)

Indeed, judicial interpretation of § 120 recognized that to claim priority benefit of the earliest application, “there has to be a continuous chain of copending applications *each of which* satisfies the requirements of § 112 with respect to the subject matter *presently* claimed. There must be continuing disclosure through the chain of applications, without hiatus, to ultimately secure the benefit of the earliest filing date.”²⁸

Congress codified in § 120 the pre-1952 CIP practice because it was well aware of the substantial benefits of CIPs in incentivizing inventors to disclose and teach not only inventions as conceived, but also their improvements and developments once conceived. Many of these developments entail substantial investments over periods of many years. Experimentation with various embodiments of inventions is often necessary, as well as operational use and research of commercialization of such embodiments. Judge Pauline Newman observed: “A patentee may also be encouraged to continue to study and invest in fine tuning the invention, with the added security that the investment, if the project is successful, will be protected even if the patentee’s improvements are not separately patentable.”²⁹ Converging on claims specifically directed to such new preferred embodiments may take many years to include in the CIP applications. At these points any improved “best modes” of carrying out the inventions must be disclosed in the CIP. Congress sought to expand disclosure of improvements but understood that inventors should be protected by issued patent claims to those improvements. However, without resorting to the original priority date, such claims may be deemed obvious in view of the parent priority applications or intervening prior art later than the priority date.

Accordingly, the US Patent Act strikes a balance between the public interest in *early* disclosure of inventions, and inventors’ ability to fully appropriate returns from their developed and perfected inventions through the CIP practice.

4 Conclusion

The reality of prosecution laches assertions is that it is rampant against patents filed post 1995. The question before the Supreme Court is therefore not an outlier circumstance—its scope is widespread and patents filed after 1995 are at risk of forfeiture.
